

Aditi Verma

FRONT-END DEVELOPER

Front-End Developer with 5+ years of experience designing, building, and maintaining responsive, user-friendly web applications using React.js, Redux, JavaScript, TypeScript, HTML5, and CSS3/SCSS. Adept at using AI tools such as Claude to accelerate development, debugging, and code quality reviews. Skilled in translating business requirements into scalable, cross-browser front-end solutions, integrating RESTful APIs with Axios, and collaborating with cross-functional teams in Agile/JIRA environments.

WORK EXPERIENCE

Front-End Developer — Tata Consultancy Services, Noida

Jan 2021 – Present

Official designation: System Engineer

- Developed and maintained dynamic, responsive web applications using React.js, JavaScript, HTML, and CSS, ensuring consistent performance and usability across devices and screen sizes.
- Implemented centralized state management with Redux, improving data flow consistency and simplifying scalability across multiple application modules.
- Integrated backend REST APIs into front-end applications using Axios, enabling real-time data exchange and seamless interaction with external systems.
- Built reusable, component-based UI elements to speed up development and maintain design consistency across large-scale portals.
- Collaborated with cross-functional teams (backend developers, QA, business analysts) in an Agile environment, using JIRA for sprint tracking and GitLab for version control.
- Debugged and resolved front-end issues using Browser Developer Tools, improving application stability and user experience.
- Leveraged AI tools such as Claude to accelerate code reviews, speed up debugging, and generate component scaffolding — improving development velocity and code quality across sprints.

PROJECTS

National Single Window System (NSWS)

Sep 2022 – Present

Tasks / Achievements

- Developed and enhanced the Ministry and Investor portal modules for NSWS, a government-facing platform, using React, Redux, JavaScript, and Axios.
- Integrated DigiLocker verification into the portal for secure, real-time document authentication, improving compliance and reducing manual verification effort.
- Designed and built the Amendment Framework from the ground up — a reusable module now adopted across multiple ministries on the platform for managing post-approval changes.
- Led key front-end modules in a full platform revamp, modernizing the UI/UX and improving performance, maintainability, and cross-browser consistency.
- Implemented feature enhancements aligned with Ministry requirements, applying efficient data structures to improve application performance and maintainability.

British Telecom

Jun 2021 – Sep 2022

Tasks / Achievements

- Contributed to the British Telecom project (UK) by enhancing daily operational tools; developed internal trackers using HTML, CSS, JavaScript, and React.js to efficiently manage and monitor service request statuses.

TCS Ignite

Jan 2021 – Jun 2021

Tasks / Achievements

- Completed structured training across JavaScript, Python, Machine Learning, Java, and DevOps fundamentals, building a strong cross-technology foundation.

SKILLS

React.js

Redux

JavaScript

TypeScript

HTML5 / CSS3 / SCSS

Axios / REST APIs

Bootstrap

Responsive Design

Python

AI-Assisted Development (Claude)

TOOLS

Git

GitLab

SVN

JIRA (Agile)

Browser Developer Tools

VS Code

ACHIEVEMENTS

Best Team Award (2024)

Tata Consultancy Services

Best Team Award (2025)
